node.js - Example of how to use node-wordpress - Stack ...

Well, almost all front-end tooling is built in Node.js. Calypso is built with popular node tools like WebPack, Babel, Jade, Uglify, Hot Loader, Marked and over 100 other modules. This is how the front end space is evolving and frankly I'm glad to see WordPress start using them

# Access Free Nodejs Wordpress

because its one space we don't see a lot of people using these tools.

Fed up of old perspectives and obsolete techniques when it comes to web development and software engineering in general i've decided to create this blog in order to share my experiences across this new adventure of moving from PHP to new and more advanced horizons, concretely Nodejs. Welcome to my changing world.

---

To NodeJS | Moving abroad from PHP to new tech-horizons

Reverse proxy works fine, but in the long run it would be great if node had a solid FastCGI module. Needing to

# Access Free Nodejs Wordpress

throw another webserver into your stack is a sign of immaturity in the platform, IMHO. If we had FastCGI, you could run php with FPM, and use node to spin up and manage your php workers when you spin up your node server.
